WHAT IS THIS PRODUCT?

Type:	Euro Medium Term Note in bearer form. It has no capital protection against market risk.
Objectives:	<p>The Autocall Athena – VISA INC. is a structured product with a risk of capital loss. The product's payoff is conditional on the performance of the Underlying (the shares of Visa Inc.). Visa Inc. operates a retail electronic payments network and manages global financial services. The Company also offers global commerce through the transfer of value and information among financial institutions, merchants, consumers, businesses, and government entities.</p> <p>If on any Automatic Early Redemption Valuation Date the Underlying closes at or above its Strike Price, the note will be redeemed early with a coupon of 10,50% per annum. If no early redemption has occurred and the Underlying closes on the Redemption Valuation Date at or above the Strike Price, the investor will receive on the Maturity Date 131,50% of its capital invested. If the closing price of the underlying on the Redemption Valuation Date is below the Strike Price and no Knock-In Event has occurred, the investor will receive on the Maturity Date 100% of its capital invested. If the closing price of the underlying on the Redemption Valuation Date is below the Strike Price and a Knock-in Event has occurred (the Underlying has closed at the Redemption Valuation Date below 60% of the Strike price); the Issuer will deliver a cash amount for the fractional part of the number of shares. You will therefore incur a partial or total loss of the nominal value, reflecting the negative performance of the Underlying as applied to the invested capital.</p>
