#### WHAT IS THIS PRODUCT?

Type:

Euro Medium Term Note in bearer form. It has no capital protection against market risk.

Objectives:

The Autocall Phoenix on Broadcom in USD is a structured product with a risk of capital loss. The product's payoff is conditional on the performance of the Underlying (the shares of Broadcom Inc.). Broadcom Inc. designs, develops, and supplies semiconductor and infrastructure software solutions. The Company offers digital and mixed signal complementary metal oxide semiconductor-based devices and analog III-IV based products, as well as provides enterprise and data center networking home connectivity, set-top boxes, broadband access, and telecommunication equipment.

If on any Coupon Valuation Date, the Underlying closes at or above Coupon Barrier Level, the note will pay a coupon of 11.00%, else the coupon is missed. Missed coupons, if any, are paid if the Underlying price is greater than or equal to the Coupon Barrier Level at the next Coupon Valuation Date. If on any Automatic Early Redemption Valuation Date, the Underlying closes at or above its Strike Price, the note will be redeemed at 100% of the capital invested. If the closing price of the underlying on the Knock-In Determination Date is below the Strike Price and no Knock-In Event has occurred, the investor will receive on the Maturity Date 100% of its capital invested. If a Knock-in Event has occurred (the Underlying closes at the Redemption Valuation Date below 40% of the Strike price), the Investor will receive on the Maturity Date physical delivery in shares and residual part in cash applying the negative performance of the Underlying on the capital invested.

The product terms provide that if certain events occur, adjustments may be made to the product. These events are specified in the final terms and principally relate to the Underlying, the product and the Issuer of the product. The return (if any) you receive on such early termination is likely to be different from the scenarios described below and may be less than the amount you invested. All redemptions described in this document (including potential gains) are calculated on the basis of the Notional Amount, excluding costs, social contributions and taxation applicable to this type of investment.

Intended Retail Investors:

The product is intended to be offered to retail investors who

- have a medium-term investment horizon (greater than or equal to three years).
- are able to bear losses up to the total of the Notional Amount.
- have been informed or have sufficient knowledge of the financial markets, their functioning and their risks, and the asset class of the underlying.

Term:

3 years

## PERFORMANCE SCENARIOS

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 5 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances. This type of scenario occurred for an investment in the Underlying between January 2021 and January 2026.

Investment de 10 000 USD			
Recommended holding period : Until the product is called or matures. This may be different in each scenario and is indicated in the table.

The figures shown include all costs of the product itself, but may not include all the costs, that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Your maximum loss would be that you will lose all your investment.

## WHAT HAPPENS IF BANQUE ET CAISSE D'EPARGNE DE L'ETAT, LUXEMBOURG IS UNABLE TO PAY OUT?

In the event of bankruptcy or restructuring (e.g. bail-in) of the issuer, pursuant to Directive 2014/59/EU, you run the risk that the capital initially invested will only be reimbursed partially, or even not at all, at maturity. In this case, you also run the risk that the capital gain will not be paid. This product cannot be considered as a deposit and is therefore not protected under the Luxembourg deposit protection system.

## WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### **COSTS OVER TIME**

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

**Recommended holding period: until final maturity.**

Under normal market conditions, Banque et Caisse d'Epargne de l'Etat, Luxembourg (Spuerkeess) ensures a daily secondary market throughout the life of the product by providing purchase and sale prices expressed as a percentage of the nominal value and the difference between the buy and sell prices (the spread) will not be greater than 1% of this nominal value. If you wish to sell this product before the maturity date, the price of the product will depend on the evolution of market parameters at the time of release. In this case, this could put the invested amount at risk.
