

Housing loan

Whether you plan on building, buying or renovating your home, the journey to your future home begins with us.

Every real estate project is unique and is handled individually. Our Housing Advisors work with you to develop a tailored financing plan perfectly adapted to your project and your needs. They will guide you through the different forms of housing loans, the types of insurance you might need, the tax benefits provided for by law, and the available forms of government assistance.

You can choose between:

- › a variable-rate housing loan, where your monthly repayments are subject to interest rate fluctuations in both directions;
- › a fixed-rate housing loan, where your budget is safe and you are protected against interest rate increases since your monthly repayments stay the same for the entire fixed interest rate period;
- › a housing loan that combines a variable-rate loan with a fixed-rate loan;
- › a housing loan that combines two loans:
 - one loan with repayment of principal and interest;
 - one loan with repayment of accrued interest, with the borrowed capital repayable no later than the loan's final due date;
- › a bridge loan, an interim financing solution pending the receipt of certain funds;
- › an EcoPrêt, which simplifies the financing of your projects to improve the energy performance of your home;
- › a climate loan, which is government assistance under the "KlimaBank" programme in the form of a reduced- or even zero-interest loan to promote sustainable energy renovation and prevent energy insecurity.

Depending on your circumstances and your project, a combination of several types of loans may be the best solution for you.
